

A Urinal is used only for collecting urine. Urinals are usually for men, although models for women have also been developed. Some Urinals use water for flushing, but waterless Urinals are also available.

Urinals for men can be either vertical wall-mounted units, or squat slabs over which the user squats. Urinals for women consist of raised foot-steps and a sloped channel or catchment area that conducts the urine to a collection technology. The Urinal can be used with or without water and the plumbing can be developed accordingly. If
